

What should be focused on when purchasing Food Packaging Bags.

Food Packaging Bags are used to pack all kinds of food. The quality directly affects food. High-quality Food Packaging Bags not only have strict production requirements, but also material requirements. Today, everyone pays attention on food safety. Food Packaging Bag has become particularly important. Here we will show you what should be focused on when buying Food Packaging Bags:

1. Size requirement

For packing different food, sizes are different. And the weight of each package is also different. So we must first confirm the weight and size of the packaged product. Then we can produce satisfactory product.

2. Material requirement

- 1). Matte OPP/Kraft Paper/Vmpet/PE composite bag (suitable for coffee)
- 2). Matte Opp20/Aluminized 9/Pe80 (suitable for tea)
- 3). PET/NY/AL/PE, PET/AL/PET/PE (suitable for pet food)

In other words, which products you are going to pack, what function you need the bags to supply? For example, if the product is pizza, we need packaging material that can be suitable for freezing; for tea packaging bags, we need moisture-proof materials; for rice bags, they must be vacuumed and moisture-proof.

Pizza packaging bags

PET Food Bags

Different material and quality will make different prices. So you need to choose your favorite product according to your requirement.

3. Bags' shape

Food Packaging Bag shape: flat bottom bag, four-side seal bag, eight-side seal, stand-up bag, one-piece bag, back seal bag, etc.

4. Customized service requirement

If you need your own logo and design, you must supply design. Different color needs different plate. All of this charge. This will make price different. By the way, you also have to reach MOQ for customized service.

The above is what customers need to know before purchasing bags. Only know this well, you can get your own satisfactory packaging bags.

5. Other Factors

Packaging economy, resource conservation, energy conservation, disposal and recycling of waste after packaging, environmental sanitation and ecological balance, etc.
